MJL-05 (244)
March 9, 1978

This is information from an entity named Hunts / Steven given to the Explorer.

Conversation about food

The initial minutes are just about MJL.
Some generic conversations about growing plants, types of foods (preferred ones, how to conserve it).
It is not totally impossible to understand the conversation even without listening to Bob's questions (his voice disappears around minute 20), but some additional effort needs to be put to follow the conversation, as there are moments of silence when Bob would be talking.
